Frequently Used Define Query

What it's for

Define data query is useful when user need to search for specific data. Instead of repeating define query steps, it is advisable to save certain data query as it will saves much time and simplify works. In this syllabus, we will guide on frequently used define query used to retrieve data based on their requirement.

1. Scenario 1: Search Data Within Date Range

User wants to retrieve DO status (Open status) Work Order with certain date range. In this scenario, date range is between 01/01/2021 and 31/12/2021 (1 year).

1.1 On the left panel of the system, click on **Work Order > Work Order**.

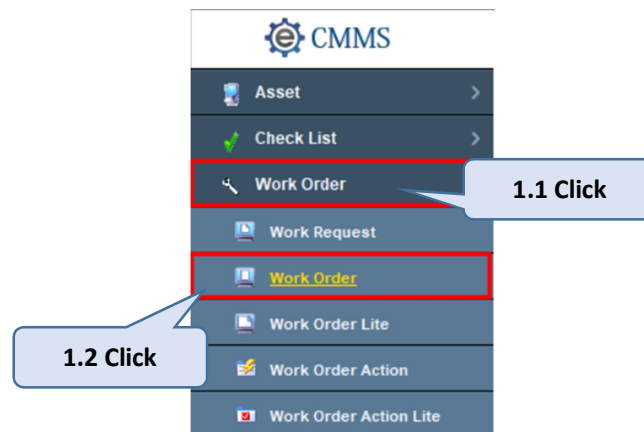

Figure 1.1

1.2 Work Order table view will pop up and data will retrieve. Click on Define button.
