Scenario

The technician receives the work request, reviews it and saw that the work request is a duplicate work request or invalid work request. In this syllabus, we will guide on how to disapprove the Work Request using CMMS Core.

1. Disapprove Work Request

What it's for

Disapproving a work request to become a work order signifies rejection of the proposed task or service, often due to insufficient information, conflicting priorities, or other reasons deemed unsuitable for execution at the time.

Disapprove the Work Request

- 1.1 On the left panel of the system, click on **Maintenance > Work Request**

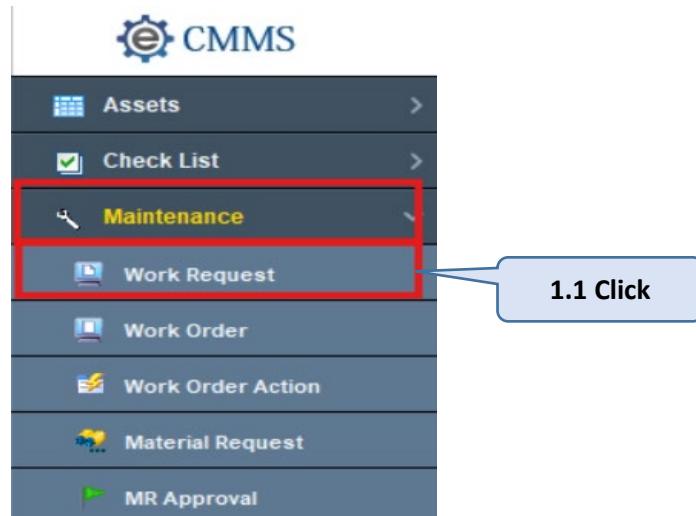

Figure 1.1

- 1.2 Work Request table view will pop up and data will retrieve. Click on **Define** button.
