Scenario

A checklist has been created, but all the information has been input incorrectly, so the supervisor decided to delete the checklist rather than edit it. In this syllabus, we will guide on how to delete the checklist in CMMS Web Core.

1. Delete Check List

Deleting the existing check list

1.1 On the left of the system, click on **Check List > Check List Master**

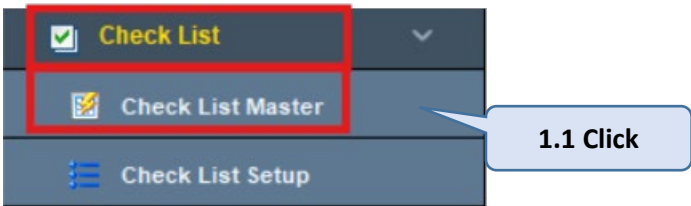

Figure 1.1

1.2 Choose the checklist to be delete and click on **Delete** button to delete the checklist information.

Figure 1.2

1.3 A prompt message would popup indicate if you want to delete the record. Click on **Yes** to continue delete the Check List Master.

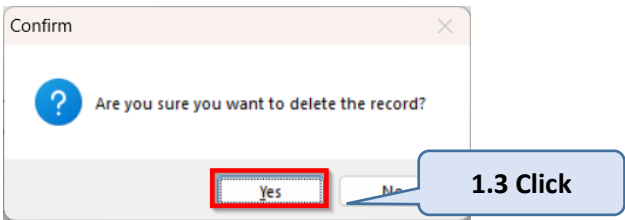

Figure 1.3

1.4 The checklist master now has been successfully deleted from the record.

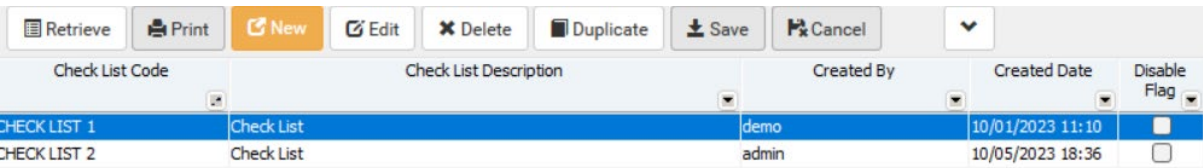

Figure 1.4
